

Donors

The central, always up-to-date registry of every blood donor

OVERVIEW

The Donors screen is the single record of everyone who has ever donated or registered to donate. Every donor's contact details, blood group, and donation history live here, searchable in seconds.

KEY CAPABILITIES

- Add, edit, or remove donor profiles: name, age, gender, blood group, phone, email, address
- Automatic eligibility tracking — the system enforces the standard 90-day gap between donations without anyone doing the math
- Instant search by name or phone number
- Filter the donor list by blood group or by eligibility status
- Each donor shows their last donation date and total lifetime donation count

HOW YOUR TEAM USES IT

Front-desk and registration staff use this to onboard new donors and pull up returning donors instantly by phone number. Because eligibility is calculated automatically, staff never accidentally accept a donation too soon after someone's last one — the system flags it and shows exactly how many days remain, which protects donor health and keeps the bank compliant with donation-interval rules.
